

Robert Varela

Front-End Engineer

Austin, TX | 512.516.9901 | rvarela@utexas.edu

Experience

Front-End Engineer

Wellsmith

Apr 2019- Present

- » Making reusable components to help make the application more consistent and easier for future developers to contribute.
- » Working with designers, product owners, and backend developers in an agile environment to turn ideas and mockups into a production-ready web application.
- » Updated the application's state container from redux to apollo.
- » Built our first end to end test suite to help with regression testing.

Front-End Developer

Arrive Logistics

Nov 2017 - Apr 2019

- » Built internal web based tools with technologies such as React, Redux GraphQL, and Apollo. These new tools helped the company stay on track to double its revenue and continue to move up in the top 50 brokerage firms.
- » Developed the company's first mobile app (React Native) to help increase market exposure and continue to be the fastest growing freight brokerage in history.

Technical Success Manager

Bazaarvoice

Feb 2017 - Nov 2017

- » Consulted with enterprise clients to resolve technical issues.
- » Facilitated necessary code changes for configuration/setup, product functionality, and bugs/enhancements.
- » Coordinate with other departments to resolve client issues.

Front-end Developer (Contract)

Patriot Boot Camp

Jan 2017

- » Designed and built the front-end of the alumni directory.
- » Structured and connected the front-end to receive API requests.
- » Wrote JavaScript logic to collect information needed to provide to the back-end.

Education

BBA Finance

May 2011

University of Texas at Austin

Web Development Immersive

Galvanize

Aug 2016 - Jan 2017
