experience

Front-end Developer (Contract) | Austin, TX

PATRIOT BOOT CAMP | January 2017

- » Designed and built the front-end of the alumni directory.
- » Structured and connected the front-end to receive API requests
- » Wrote JavaScript logic to collect information needed to provide to the back-end

Customer Success Team Lead | Austin, TX

SELF LENDER | February 2016 - August 2016

- » Grew customer support team to five people which prepared the company to handle more volume.
- » Built the support tools for the entire customer success team which reduced response rates by 50%.
- » Set up support analytics to track top issues. This helped other departments understand and fix the issues, which provided a better customer experience.

Founding Member / Market Manager | Austin, TX

HOOKED | July 2012 - July 2014

- » Launched mobile app and led it to become the #1 local college app at The University of Texas at Austin since August, 2013.
- » Designed the company's pricing model which moved the app from free to its first paying customers.
- » Kept 100% of customers on board with the rebrand. This helped the company stay as the #1 app and grow in three other markets.
