Robert Varela

Front-End Engineer

Austin, TX | 512.516.9901 | rvarela@utexas.edu

Experience

Front-End Engineer
Apr 2019 - Nov 2019

Wellsmith

» Made reusable components to help make the application more consistent and easier for future developers to contribute.
» Worked with designers, product owners, and backend developers in an agile environment to turn ideas and mockups into a production-ready web application.
» Updated the application's state container from redux to apollo.
» Built our first end to end test suite to help with regression testing.

Front-End Developer
Nov 2017 - Apr 2019

Arrive Logistics

» Built internal web based tools with technologies such as react, redux, graphQL, and apollo. These new tools helped the company stay on track to double its revenue and continue to move up in the top 50 brokerage firms.
» Developed the company's first mobile app (React Native) to help increase market exposure and continue to be the fastest growing freight brokerage in history.

Technical Success Manager
Feb 2017 - Nov 2017

Bazaarvoice

» Consulted with enterprise clients to resolve technical issues.
» Facilitated necessary code changes for configuration/setup, product functionality, and bugs/enhancements.

Front-End Developer (Contract)
Jan 2017

Patriot Boot Camp

» Designed and built the front-end of the alumni directory.
» Structured and connected the front-end to receive API requests.
